LUIS MONTES DE OCA

Junior Full Stack Web Developer

Madrid | luismonteswebs@gmail.com | Portfolio: luismontesdeoca.vercel.app

PROFILE

Junior web developer with real client project experience, modern frontend development and advanced use of AI as a working tool. After completing the Higher Vocational Degree in Web Application Development (dual) and broadening my experience in different professional settings, I am actively looking for a job where I can add value, keep growing and contribute to ambitious technology projects.

TECHNICAL SKILLS AND TOOLS

Frontend: React, JavaScript, TypeScript, HTML5, CSS3
Backend: Node.js, Java, PHP, SQL
Databases: MongoDB, MySQL, MariaDB
CMS / eCommerce: WordPress, PrestaShop, WooCommerce, Shopify
Accessibility and responsive design: WCAG, responsive design, Figma
Development environments: VS Code, Cursor, OpenCode, Freebuff
AI assistants: Claude, GitHub Copilot, Codex, Gemini, ChatGPT, DeepSeek, Ollama local, Warp
Version control / deployment: Git, GitHub, GitLab, Cloudflare
Working methods: Scrum, Kanban, teamwork with Git
Design and automation: Canva, FlexClip, DALL·E, Make, Moodle

EXPERIENCE

Web Developer · Freelance

06/2026 – 07/2026

- Development of websites for real clients, leading each project from start to finish: goal definition, architecture, development and delivery, focusing on performance and local SEO and GEO positioning.
- Strategic use of AI (prompts, Claude, Gemini) to speed up development without giving up technical judgement, reviewing and customising every delivered result.

Technologies: HTML5, CSS3, JavaScript, React, Node.js, GitLab, Cloudflare, Cursor, Claude, Gemini, local SEO, GEO

Web Developer · AwakeLab

03/2026 – 06/2026

- End-to-end development of the company's main project: an order management web platform built from scratch with our own code.
- React frontend connected to a MongoDB database, with the repository and workflow managed on GitHub.
- Faster development and better code quality through intensive use of AI (Claude, GitHub Copilot, Codex, Copilot CLI, Cline) in VS Code.
- Continuous training on the Moodle platform alongside the project.

Technologies: React, MongoDB, GitHub, VS Code, Claude, Codex, Copilot CLI, Cline, Node.js, HTML5, CSS3, JavaScript

Web Developer · Freelance

10/2025 – 02/2026

- Direct collaboration with a self-employed professional building complete websites for real clients, taking full responsibility for the final product delivered.
- WordPress development and complementary technologies, adapting each solution to the specific requirements of each client.
- Management and maintenance of client databases, and local SEO and GEO optimisation of the delivered projects.

Technologies: WordPress, databases, local SEO, GEO, Ollama local

Web Developer, in training · LaPrimeraWeb

09/2024 – 06/2025

- Dual Higher Vocational Degree internship in a real company: web development, digital design, business audit and client acquisition (direct contact and door-to-door).
- Website creation with HTML5, CSS3, JS, WordPress and PrestaShop, and graphic design (logos and visual resources) with Canva, FlexClip and DALL·E.
- Development of GPT agents (ChatGPT, DeepSeek) to automate tasks, and social media automation with Make.
- Management and update of large client databases.

Technologies: HTML5, CSS3, JavaScript, WordPress, PrestaShop, Canva, FlexClip, DALL·E, ChatGPT, DeepSeek, Make
